1.01 - Statistics
Notes: Categorical Data

Categorical Variable	Places an individual into one of several groups or categories
----------------------	---

Quantitative Variable	Takes numerical values for which it <u>makes sense to find an average.</u>
-----------------------	--

- Identifiers – When a number is used to represent an individual
- Sometimes categories are disguised by numbers
 - Example: Age Range, Zip Code
 - ↳ Grouping of a Quantitative var.

Distribution	The distribution of a variable tells us what values the variable takes & how often it takes them.
